Education

University of Waterloo

September 2021 – April 2026

Bachelor of Statistics, Computer Science Minor

Waterloo, Ontario

- Ronald G. Scoin/Rene Descartes National Math Scholarship (\$18,000)

Work Experience

Jane Street Capital | Python, OCaml

May 2025 – August 2025

Quantitative Trading Intern

New York

- Return-interned to Jane Street's intensive 11 week summer trading internship, working on the Fixed-Income desk.
- Researched and built out impact based signals for a variety of debt classes, passed relevant FINRA certification exams (SIE, S7, S57), and spent extensive amounts of time watching and participating in live trading.

xAI (Formerly X/Twitter) | Python, Scala

Jan 2025 – April 2025

Software/Machine Learning Engineering Intern

Palo Alto

- Built and shipped Evergreen, a large-scale video recommendation system on the Core Product team, improving discovery and distribution of older content across the platform.
- Owned end-to-end iteration (feature + ranking changes → online A/B tests → launch), leveraging Grok 3 to improve feed recommendations. Delivered a +25% lift in Evergreen engagement impacting 400M+ monthly active users.

Jane Street Capital | Python

May 2024 – August 2024

Quantitative Trading Intern

New York

- Participated in Jane Street's intensive 11 week summer trading internship, building novel end-to-end research projects, participating in frequent trading exercises, shadowing full timer traders, and analyzing diverse financial markets.
- Researched and built a model to predict unique variance on the options desk, as well as a model to forecast hydroelectric generation on the commodities desk, both using pandas; additionally engaged in the strategy elective.

Accutar Biotech | C++, C, Python

September 2023 – December 2023

Software Research Intern

Calgary

- Worked at a frontier Biotech startup, improving downstream drug-protein interaction analysis performance by up to 30% by reducing storage bottlenecks and accelerating read/write and encode/decode paths.
- Built an automated benchmarking + visualization harness for rapid performance regression testing, reducing evaluation iteration time by 80%+ for model evaluations.

Projects

Obsidian Research | Python, C++

January 2026 – Present

Managing Direct and Lead Researcher

- Managing a stealth proprietary trading shop comprising of several highly accomplished and experienced partners. Building and deploying event based market-making strategies, and are actively seeking external funding partnerships.

Kalshi NBA Trading Strategy | Python

May 2025 – June 2025

Quantitative Trader/Researcher

- Researched and built out proprietary trading interfaces and unique strategies to market make on Kalshi for the 2025 NBA playoffs. Successfully grew our initial \$15k investment to over \$150k+ by the end of the playoffs.

Volunteering Experience

Waterloo Quant Club

September 2025 – Present

Founder and President

- Led initiatives in running Canada's first university-wide, and first international trading competition in our first year. Designed the games, rules, scoring, and logistics, to deliver novel experiences for an under-represented market.
- Grew and led an executive team of 30+ students, and a general member pool to 1,000+ Waterloo students, making WQC the largest club on campus within the first year of operation.
- Raised \$70,000+ in sponsorship from leading quant firms, establishing long-term partnerships for the club.

Hobbies and Interests

- Competitive Dodgeball, Darts, Poker, Ice Hockey, Basketball, Speedcubing, Outdoor Photography, Hiking
